

**Gurunanak College of Pharmacy, Nari, Nagpur – 440026**

### **7.3 Institute Distinctiveness**

#### **Creating Globally competent pharmacist**

The vision of the institute is, “To create globally competent pharmacists”. Considering the fast pace of developments in the field of science and technology, it is highly challenging to create pharmacists who are well aware of the latest advancements in the field and are readily employable in the various areas of the pharmacy profession e.g manufacturing, quality control, quality assurance, regulatory, clinical, intellectual property, active pharmaceutical ingredients/intermediates, cosmetics, nutraceuticals, marketing, etc. GNCP has accepted this challenge and adopted multiple strategies to achieve this vision.

We keep very close ties with the pharmaceutical industries and make our best efforts to utilize those ties in the best possible ways. We organize lectures from the subject matter experts from industry who train our students about the current trends going on in the different fields of industries. We also invite equipment/machine manufacturers who explain and demonstrate the latest models that are in use in the industry. When this is combined with industrial tours that are organized every year for students, the student gets a clear picture of the industry and activities conducted therein. This help student to identify their interests and to plan his/her career path.

A Graduate Employment Training Program is implemented in the institute where different training modules are designed and conducted based on the feedback/comments from the industry. The objective of this program is to identify needs of the industry that are not fulfilled by the existing curriculum and to conduct training programs in order to impart industrially useful knowledge and skill to the students.

With highly qualified faculty and availability of all the programs ensures the facilitation of vertical progression of students to the highest degree. Further, the faculty works on collaborative research projects with industry, and due to which our students get direct exposure to industry-oriented research that helps them to get very attractive placement offers.

Along with the development of all the technical aspects, due care is taken to train the students about the essential soft skill and human values that makes them competent professional, and responsible human being.
