- 2 (Neutral)
- 1 (Disagree)
- 0 (Strongly disagree)

Give three observation / suggestions to improve the overall teaching – learning experience in your institution.

95 responses

.

No

.

....

Nothing

-

No suggestions

No suggestions

1. Teaching should be interactive.
2. Focus on average students.
3. There should be a sports period in a week

1. By giving proper notes.
2. By taking class tests on friday-saturday on prviously discussed topics.

Teachers are interact with us , they are understood our feelings, they are help us every time

Our institute always supporting and motivate in study and develop the different kind of skills

Very good

All good

Need more feild visit experience, out of book study related to our course needed

Mic should be provided. For lectures

Share ppts
notes

Nopz

Game base learning

1. The areas of difficulties in a particular subject should be taken care of
2. Teachers are always encouraging us but should also enhance our qualities from non academic perspective

They not conduct the lectures

No suggestions.

Everything is best.

All things are good

Yes

as for me all is well

If it's increase the active participation of every one

No comments

promoting internship, student exchange, field visit opportunities for students !

Complete the course properly

Provide notes while teaching

- 1)More interaction
- 2)More practical knowledge
- 3)

1. Teaching should be done by using some kind of educational videos along with dictation.
2. The demonstration of practicals should be given by the teacher first (Especially POC).
3. Surprise Tests should be done in the intervals of time.

Should use more amount of practical learning, application based teaching and discuss opportunities ahead not for jobs but also entrepreneurship.

As mpharm student need to gain knowledge regarding industrial work .
(Industrial visit).

Nil

Required more placement, more industry visiting,

Good

They don't even guide us regarding the syllabus like what to study what points should be covered in a particular answer don't even discuss the paper pattern don't even tell us the internal marks don't even check the papers they are just now days taking donations for the newly admitted students in sake of money conducting programs that too costly just for money if not paid fees so not letting us to give papers not even supplying the books from library just for the sake of money talking is way to like humiliating literally disappointed for this institution

More field visits

Internships

NA

Some Teachers shouldn't be biased with the students

nathing

All is good.....

I think teachers should have to take proper lecture plue also they have to do proper study of their subject then teach us

1. To complete whole syllabus before every sessional test
2. To give notes time to time when asked

None

Friendly is the most important for teacher

Everything is good

Vast course and not enough time to complete
If did something about this, will be much more beneficial!

Overall Good

Excellent

Regular lecture with effective clearing their concepts.

1. Mock test should be conducted regularly for any curriculum or activity.
2. Those students who are weak have to give seminar from which they become confident by finding answers by itself..
3. Readymade notes should not be provided..and students have to make there notes from the book which is mentioned in syllabus and referred by teachers... And told them avoid PV publication book as much possible...

..

1. Mentor should call their student every week or in every 2 week to get te student feedback.

Syllabus should be covered totally

Well managed Staff but need to take sometime Regulally

Teaching is good but sometimes they must use chalk and board

The faculty needs be more approachable

There's a need for a progressive environment, not judgemental

The teachers should be polite and fair

Try to communicate with students ..

Regular classes

Weekly test of theory should be conducted

Teachers are interact with us, they are solve our problems

Teachers can try to keep student-teacher intraction section one on one so they can discuss about the places they can improve in study or talk about life in general so that it can help students to open up more and get out of there shell and I think theory exams are not best to see students potential completely, critical thinking like MCQ question with mix theory questions can help students in over all learning more than just trying to remember some questions that repeat every year.

Lectures should be taken for better understanding of subjects

The teaching process is upto the mark and very effective without a doubt.

To improve learning, participative in improvement of student
